

TherAFIRMlight™

THERAPEUTIC GRADIENT COMPRESSION HOSIERY

What does gradient compression hosiery do?

True gradient compression stockings improve circulation. THERAFIRMlight™ stockings are designed to deliver a controlled amount of pressure which is greatest at the ankle of the garment and gradually decreases towards the top of the stocking. This gradient pressure promotes better blood flow which in turn helps to control swelling and leg fatigue.

Who should wear light support hosiery?

- Tired, aching, fatigued legs
- Swollen feet, ankles, and legs
- Stand or sit for long periods
- Expectant mothers

Additionally, many individuals without the preceding conditions simply appreciate wearing our gradient compression hosiery. Most people love the way they make their legs feel. Always consult with your physician before wearing compression stockings.

The Therafirm Advantage

For over 50 years Therafirm has been a leader in manufacturing healthy, gradient compression products. We are committed to providing quality gradient compression products and innovating the way people view compression. All our products are proudly made in the USA in our own manufacturing facility.

Comfortable and Cool

THERAFIRMlight™ women's products are made with Lycra® and nylon fibers and the men's with a cotton/microfiber blend for the softest garments while still providing shaping support. Features for comfortable all-day wear include a soft, comfort band on the knee-high stockings and trouser socks, a soft, knit-in waistband on pantyhose and tights, and a soft, expandable top on maternity pantyhose.

Additionally all THERAFIRMlight™ gradient compression hosiery garments are made using our Micro-Cool® process. Micro-Cool® creates a wicking effect so moisture evaporates from the skin quickly, therefore providing a comfortable coolness.

Fashionable

THERAFIRM® uses advanced technologies for developing products that are fashionable and comfortable while delivering the health benefits you need. We offer a wide range of advantages including updated shades, sheer yarns, variety of styles, and knit pattern texture options, so you will feel good about wearing compression hosiery.

Styles and Colors

Men's Trouser Socks

Men's dress socks feature wide ribbed style, non-binding band that holds the socks in place all day, and comfort heel and toe.

Women's Trouser Socks

Ribbed and diamond patterned trouser socks feature soft comfort band that is non-restrictive while staying in place all day. Features comfort heel and toe.

Women's Knee-High Stockings

Fashionable, sheer support stockings featuring a soft comfort band and reinforced toe for durability.

Opaque Tights

Dress your legs in warmth and style with these fashionable light support micro-fiber tights. Tights provide an extra layer of warmth and the light support helps energize tired legs and feet.

Pantyhose

Fashionable, sheer light support pantyhose made with breathable fibers to provide shaping support. Features a soft knit-in waistband to prevent rolling and enhance comfort. Reinforced toe for durability.

Maternity Pantyhose

Fashionable, sheer light support maternity pantyhose made with breathable fibers to provide shaping support. Soft, expandable top for a comfortable fit through pregnancy. Reinforced toe for durability.

Light support gradient compression hosiery is ideal for those individuals required to sit or stand for long periods of time. Designed to help improve circulation and prevent swelling, TherafirmLight™ products can assist in energizing tired legs and feet.

Simple Leg Health Tips

Wear Gradient Compression Stockings

Energize tired legs and feet, improve circulation, and assist in the prevention of swelling.

Keep moving when possible

Rather than standing in one place or sitting still, stimulate muscles by walking around as often as possible and by simply flexing you leg or calf muscles.

Avoid crossing your legs

When you sit, avoid crossing your legs which can inhibit essential flow of blood to your legs and feet.

Elevate your feet

When possible elevate your feet while sitting.

Wear comfortable shoes

Avoid further leg and foot discomfort by wearing low-heeled shoes with adequate support.

THERAFIRM®

"Finally, compression I can wear!"

Core-Spun Gradient Compression Socks for men and women look and feel like a soft, comfortable everyday sock with the added benefit of true gradient compression. The ultra stretchy yarns make the socks easier to put on and the added thickness makes the socks more comfortable for all-day wear.

Available in 10-15mmHg, 15-20mmHg, 20-30mmHg and 30-40mmHg.
Patent Pending.
