

THERAFIRM®

THERAPEUTIC GRADIENT COMPRESSION HOSIERY

What does gradient compression hosiery do?

True gradient compression stockings improve blood flow. THERAFIRM® stockings are designed to deliver a controlled amount of pressure which is greatest at the ankle of the garment and gradually decreases towards the top of the stocking. This gradient pressure promotes better circulation and helps control swelling, leg fatigue and other problematic leg conditions.

Who should wear gradient compression hosiery?

People who have or are experiencing any of the following conditions can benefit from wearing gradient compression hosiery:

- Tired, aching, fatigued legs
- Swollen feet, ankles, and legs
- Stand or sit for long periods
- Expectant mothers
- Overweight

Additionally, many individuals without the preceding conditions simply appreciate wearing our gradient compression hosiery. Most people love the way they make their legs feel. Always consult with your physician before wearing compression stockings.

Great for Travel

Therafirm® 15-20mmHg gradient compression trouser socks for men and women are designed to help prevent edema, leg discomfort, and deep vein thrombosis for long distance travelers.

Contraindications: Any skin irritations, allergies to dyes, congestive heart failure, arterial disorders, existing DVT. If any of these conditions apply, consult your physician for advice.

Comfortable and Cool

THERAFIRM® products are soft, cool and comfortable for all day wear. Products feature soft, comfort bands on the knee-high stockings and trouser socks, soft waistbands on pantyhose, and a soft, expandable top on maternity pantyhose. Additionally all THERAFIRM® gradient compression hosiery garments are made using our Micro-Cool® process. Micro-Cool® creates a wicking effect so moisture evaporates from the skin quickly, therefore providing a comfortable coolness.

Fashionable

THERAFIRM® uses advanced technologies for developing products that are fashionable and comfortable while delivering the health benefits you need. We offer a wide range of advantages including updated shades, sheer yarns, variety of styles, and knit pattern texture options, so you will feel good about wearing compression hosiery.

The Therafirm Advantage

For over 50 years Therafirm has been a leader in manufacturing healthy, gradient compression products. We are committed to providing quality gradient compression products and innovating the way people view compression. All our products are proudly made in the USA in our own manufacturing facility.

Other Gradient Compression Products

THERAFIRMlight™
THERAPEUTIC GRADIENT COMPRESSION HOSEY

Energize tired, aching legs and feet!

THERAFIRMlight™ Compression Hosiery offers 10-15mmHg light support for men and women to help energize tired legs and feet, improve circulation, and assist in the prevention of swelling. Women's products are made with Lycra® and nylon fibers and the men's with cotton/microfiber blend for the softest garments while still providing shaping support and true gradient compression.

core-spun
by THERAFIRM®

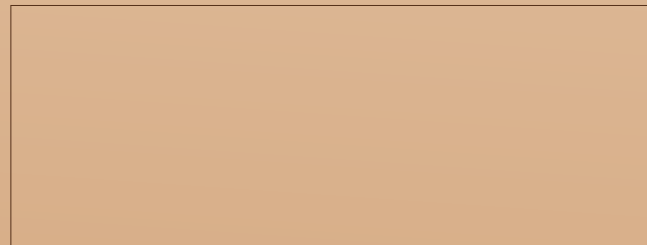

"Finally compression I can wear!"

Core-Spun Gradient Compression Socks for men and women look and feel like a soft, comfortable everyday sock with the added benefit of true gradient compression. The ultra stretchy yarns make the socks easier to put on and the added thickness makes the socks more comfortable for all-day wear.

Available in 10-15mmHg, 15-20mmHg, 20-30mmHg and 30-40mmHg. Patent Pending.
